Simplify Mail Assembly

A smart, versatile solution for folding and inserting your documents into envelopes

Sending communications to your customers is an essential part of your business. Having an outgoing mail process that is accurate and fast is to key to creating customer communications efficiently. When using a manual assembly process, you risk making mistakes and using time that could be put towards completing other valuable work. With the DS-40i folder inserter, you can automate mail creation to reduce assembly time from hours to minutes, freeing up time, lowering costs and ensuring the right document is sent to right customer.

Thirteen times faster than manual assembly

The DS-40i's automatic cascade feeding function eliminates downtime and helps optimize productivity by automatically changing feeding trays when a tray runs out of paper. The manual feed function allows you to feed up to five sheets at one time, even if the sheets are stapled.

Intuitive operation

The DS-40i is operated through an intuitive 5-inch glass, color touchscreen interface. With the incorporated Wizard software, you will be able to easily set-up and recall your jobs or adjust system settings when needed; letting the software guide you each step of the way.

Flexible, accurate document feeding and folding

The DS-40i can work with a wide variety of documents, such as invoices, statements and inserts. Quadient's double document detection prevents double feeding to ensure your mail gets delivered to the right person, every time. Give your communications a professional look and feel by choosing one of the four folding choices: Single fold, c-fold, double parallel, or tri-fold.

DS-40i

1. Sheet Feeders
Continuous operation is achieved by linking feeders. If one feeder runs empty, the other one automatically takes over, allowing you to refill on-the-fly as needed until your job is complete

2. Touchscreen Control Panel
Intuitive 5-inch color touchscreen makes every job set-up a breeze.

3. Folding Catch Tray
Handles a variety of envelopes, including C5, C5/6 and 6x9 formats. Folds up to take up less space when you're not assembling mail.

4. Inserts and BRE Feeder
Insert specific communications, such as flyers, marketing messages or return envelopes using this dedicated feeder.

Business Impact

Revenue Growth
Faster turnaround from customers via mail automation

Customer Engagement
Ensures effective communication with customers

Risk Mitigation
Documents are always sent to the correct recipients

Expense Control
Reduced operating costs via mail automation
